Summary

I'm a C++ developer with some experience of Python and a big passion for functional programming/Haskell. My favorite topics include distributed systems (with specialized education) and compilers (as an amateur).

Education

Higher School of Economics — 2018–2025

B.S in Applied Mathematics and Informatics

Specialization: Distributed systems

Experience

Yandex — July 2019–September 2019

C++ intern

• Distributed systems • Build systems

Kaspersky — November 2020–April 2022

Haskell/research intern

• Compilers

Yandex — August 2022–April 2023

C++ junior

• Distributed systems • Geo

Skoltech — December 2025–present

C++ developer

• 6G

Skills

Programming Languages	Experienced: C/C++ | Haskell Familiar: Javascript | Python | Bash
Software Development	OOP | FP | GIT | CLI | Linux Distributed systems
Frameworks & Libraries	STL | Boost | GDAL | NumPy

Extra

- I also love algebra, and have quite a bit of experience there. Here's my algebra project written in Haskell for my coursework. It's actually quite impressive — performance outclasses similar C++ projects, and EDSL it provides is nice (for my taste).
